ELECTRONIC TRIM

The KIC exit hardware can be matched with electronic full lever trim; KIC5510PK or KIC5210PK, providing enhanced access control.

KIC5210

KIC5510

THE KIC5210PK ELECTRONIC TRIM

The KIC5210PK is a standard duty ANSI Grade 2 lock. It incorporates electronic and mechanical methods to control access via stainless steel electronic keypad or key.

Programming code levels & capacity:

- 1 Master Code
- 80 User Codes
- 1 Sub Master Code
- 10 one time User Codes

THE KIC5510PK ELECTRONIC TRIM

The KIC5510PK is a Standard duty ANSI Grade 2 lock. As standard it incorporates multiple methods to control access via keypad, phone, card or key with the owner able to select the most appropriate for installation and use. The locks programming features can be managed via the keypad or when paired with a compatible smartphone using the  Connect App. The keypad and linked smartphone can add users of the lock (phones, codes or cards) known as clients.

Clients: The lock can store 1 Admin phone, 50 Phone clients, 800 keypad clients or 800 card clients

PROGRAMMING FEATURES

Via Keypad: *Change Master Code *Enter pairing mode *Add/delete Client Code *Add/delete client card *Delete

client phones *Lock down *Set passage mode *Set First Man In (when set in passage mode lock will remain locked until valid client opens lock and continue in passage mode when FMI is programmed) *Set dual credential (lock only opens on presentation of two valid clients) *Keypad Illumination (Keypad illuminates on button press or proximity).

Via App: The K3 Connect App can program all keypad programs but also the following: *Set names for locks *Set Client names *Set Lock parameters e.g. daylight saving, re-lock delay etc Set Client timed access rights day/hour, weekly.

SPECIAL APP FEATURES

Generate **TAD** codes (Time And Duration)

TAD codes are one time specific codes that can be generated in the App on phone or device anywhere, without the need to be near the lock. **TAD** codes once generated can be forwarded or 'shared' with engineers or guests who with the ontime **TAD** code gain access within the selected time.

Generate **ATAD** codes (Auto repeat Time And Duration)

ATAD codes are time specific codes that are automatically generated in the App and issued on a daily or weekly basis up to a maximum of 4 weeks. Useful when managing a group of people who change at short notice or for doors requiring active management eg restrooms in restaurants.

ATAD codes are issued via single email to person responsible for group or door.

Block **TAD** Codes

TAD codes can be blocked by the Admin phone if required.

View Audit Trail

Audit trial of activity on lock can be viewed and shared.
