BORGLOCKS.COM

BL7000 Series

The **BL7000** is an established and reliable, heavy duty lock designed for industrial and high traffic areas. This comes with on the door code changing, available from the inside handle and the ability to put it into a free passage mode.
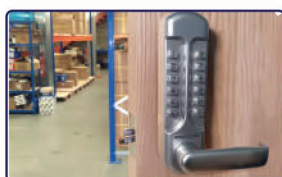

Available with a wide range of different latch and lockcase solutions as well as a modification to the handle type to make it a knob turn. This keypad is suitable for external situations and boasts a 100,000 cycle test, proving its strength and reliability. Designed to act as a retrofit upgrade of the BL5000 series as well as the Unican 1000 & 5000 models.
