

KeyInCloud

The Key Is In The Cloud

Introduction to KeyInCloud

The core KeyInCloud Platform was developed and introduced in 2011 and our software development team were early pioneers in the Cloud Based Access and WiFi Smart Lock marketplace. Today our Cloud Platform manages almost 500,000 openings across the globe.

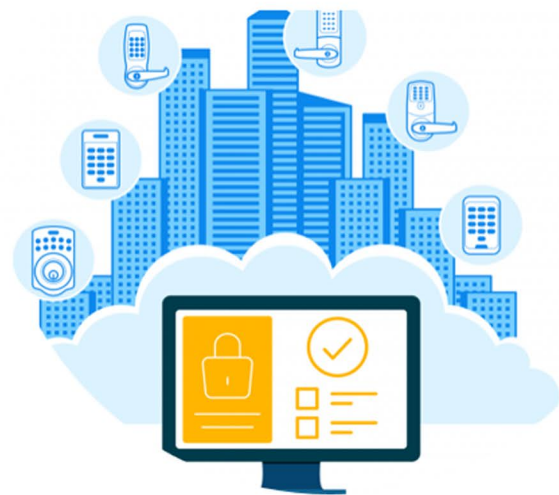

Platform Overview

KeyInCloud offers a Cloud Based Access Control and Management Platform that eliminates the need for any Premise based PC's/Software, Panels or wiring infrastructure on Premise. We utilize your WiFi Network to communicate and manage edge devices via the Cloud.

SIMPLIFYING THE MANAGEMENT AND MONITORING OF YOUR ACCESS CONTROL SOLUTIONS

Web Management

The KeyInCloud platform offers a very intuitive user friendly browser-based interface that allows anyone to easily manage the system, add & delete users, and manage access even on their first login. With no on-site software or system server needed, we have taken the complexity out of your Access Control management as well as the need for IT staffing to manage your system and greatly reduced the cost.

Smart Lock Management

Manage one or 100's of locations all from our KeyinCloud Platform. Want to know when your employees arrive at their location? Need to add or revoke access remotely? Each location calls direct to our cloud, keeping one central location for all access data, transactions and events. We leverage existing WiFi infrastructure to eliminate the need of having any premise based servers or software.

Centralized Control for Multiple Locations

KeyinCloud removes the need for on-site servers and a dedicated workstation, letting you manage multiple sites from one location, even if they are spread out across the world. Quickly and easily add additional doors or building sites to the KeyinCloud platform. You can easily grow as your operations expand and maintain all data within our centralized Cloud database.

SIMPLIFYING THE MANAGEMENT AND MONITORING OF YOUR ACCESS CONTROL SOLUTIONS

Control Multiple Lock Types

The KeyinCloud Platform is hardware agnostic allowing you to manage a wide range of 3rd party Stand-Alone and Hardwired platforms include Mercury control panel based solutions. All legacy hardware can be migrated to our Cloud based management platform so you can manage legacy exterior entry doors, interior doors, garage entry, elevators, and other common door areas all on the same system. We also integrate with other 3rd party WiFi, Z-Wave edge devices such as Thermostats, Sensors etc. etc..
