KIC K3-Connect GATEWAY

Access Point

Lock or Locks

KEYINCODE SMART LOCKSETS are operated by the  CONNECT APP communicating via a 802.11 b/g/n (2.4GHz wireless network)

Power Source is wall socket using a USB type A connector to obtain steady power. This is the same plug-in charger used for smart phones (not included)

Gateway will connect to an AP (Access Point) to get internet access. The AP must have a known SSID (SSID is short for *service set identifier*. The SSID is used as a name to identify a wireless router connection i.e. NetGear, Joey's House etc.)

Compatible with iPhone 4S or above with IOS 8.0 or above, Android 4.3 or above with Bluetooth low energy capability

REMOTE ACTIONS via GATEWAY

- Lock/Unlock
- Set Lock Parameters
- Manage Clients (individual users) Phones, Cards, Codes
- Audit
- Event Notification
- Lock Status

Installation tips:

1. Do not enclose Gateway in any metal cabinet (will block wireless signals)
2. Do not put Gateway within 3 feet of Access Point (potential interference)
3. 15' or closer for best signal
4. Clear line of sight for best signal

Gateway Complies with FCC Class B Digital Device, pursuant to part 15 of FCC rules.

KEYINCODE, LLC 55 Concord Street Unit 231 North Reading, MA 01864 978-207-0269 <https://keyincode.com>
